

April 27th-Math 1st Grade 7 Home Learning Lesson Plan

Hey grade 7! I hope everyone has been enjoying this beautiful weather and staying safe. Listed below is this week's lesson plan. Please e-mail me your work by Friday May 1st at: Andrea@esgenschool.ca

ASD-N Weekly STEAM project	Upcycling is taking a product or material that you would generally throw away and turning it into something new and useful. This helps keep non-biodegradable junk out of landfills and our ocean. Your challenge is to find some items around your home that are broken or no longer being used and create something new!
Math IXL	Spend 20 minutes each day on IXL at your grade level. https://ca.ixl.com/math/
Multiplications (10 minutes each day)	Everyday go over your multiplications for 10 minutes. Write them down, say out loud, and have a family member quiz you on your multiplication tables. Here are some extra multiplication practice sheets. https://www.thoughtco.com/multiplication-worksheets-for-times-tables-2311662
Numeracy Word Problems	Jeremiah spends 2 hours a day playing video games. How many total hours does he spend on video games in 1 week? Addison gets paid \$8.00 an hour at her job. How much money would she have earned if she spent 2 hours a day working, instead of playing video games? The class has 35 children. If they are put into 5 teams, how many children will be on each team?
Language Arts	Read for 30 minutes every day. -IXL- Language Arts: Go to grade 7 and work on "Punctuation, Capitalization, and Formatting" Start at F.1 and stop when you have completed F.7. https://ca.ixl.com/ela/grade-7

Journals
(One each day)

Write a journal every day. Listed below are some Journal ideas:

- What is a "perfect" day and why?
- If you could have one Famous person over for Dinner who would it be and why?
- Where do you see yourself in 20 years?
Will you still be in school? Married? Have Children? Traveling the world? Job?
- Who do you miss the most during this time?
Why?
