

Hey Grade 7! I hope everyone had a great weekend. Listed below is this week's lesson plan for May 18th- May 22nd. Please email me your work by Friday at: andrea@esgenschool.ca. If you have any questions, please feel free to email me anytime.

<u>ASD-N Weekly STEAM Project.</u>	<u>MATH</u>	<u>LANGUAGE ARTS</u>
<p>THE CHALLENGE: Habitat loss poses the greatest threat to species. The world's forests, swamps, plains, lakes, and other habitats continue to disappear as they are harvested for human consumption and cleared to make way for agriculture, housing, roads, pipelines, etc. We can make a difference by learning more about our local habitats.</p> <p>Your challenge is to observe and compare 2 circular sections of Earth (hula hoop size or larger!). Which plot has the greatest number of species? Can you identify them all? What questions do you have based on your observations?</p>	<p>-This week for IXL Math, I would like everyone to spend 20 minutes each day on "Ratios, Rates, and Proportions" from grade 7, L.1-L.14. Here is a link to refresh your memory on Rates and Ratios: https://www.youtube.com/watch?v=R02nYUBVvqI</p> <p>- Now that everyone has their JUMP math book at home, we are going to work on Introduction to Ratios and Equivalent Ratios. Page 189-192. When you have completed your work, please email me a picture of your answers.</p>	<p>-Read for 30 minutes every day.</p> <p>- Watch a movie you have been wanting to see. Write a short review based on your viewing.</p> <p>*Movie reviews usually have a short summary of the story and characters. *They also include a recommendation for readers to either see or skip the movie.</p> <p>-<u>IXL- Language Arts</u> (20 minutes each day) This week, I would like everyone to work on "Literary Devices" grade 7 (0.1-0.5)</p>
